

November 9, 2006

Dear Healthcare Professional:

You may be aware that Perrigo Company has initiated a recall of an estimated 11 million bottles of private label, 500-milligram caplets of acetaminophen. It is important for consumers to be aware that **TYLENOL[®]-brand products are not affected by the current recall**, and that McNeil Consumer Healthcare does not produce any products marketed under store brands or private labels.

As acetaminophen is the medicine in all TYLENOL[®]-branded pain relievers, McNeil Consumer Healthcare wants to remind its consumers that its products are safe and effective when used as directed and manufactured with the highest quality control standards.

We hope this information is helpful to you in responding to questions that you may receive from your patients. If you have any questions or comments, please contact our Medical Communications Center at 1-800-962-5357.

Sincerely,

A handwritten signature in black ink, appearing to read "Edwin Kuffner", written in a cursive style.

Edwin Kuffner, MD
Senior Director, Medical Affairs
