TYLENOL® works differently than other pain relievers

TYLENOL® (acetaminophen) works differently than MOTRIN® IB and Advil® (ibuprofen), Aleve® (naproxen sodium), and aspirin, which are all NSAIDs.*

TYLENOL® won't increase your risk of heart attack, heart failure, or stroke the way ibuprofen or naproxen sodium can

TYLENOL® won't increase your blood pressure the way NSAIDs sometimes can

TYLENOL® doesn't interfere with aspirin heart therapy the way ibuprofen can

TYLENOL® won't interfere with certain high blood pressure medications the way NSAIDs sometimes can

Check your medicines

Always read and follow the label, and take **ONLY 1** medicine that contains the same kind of active ingredient at a time. This may help reduce your risk of harmful side effects.
